

CertKit: Certified Information Systems Security Professional (CISSP) 2021

The Certified Information Systems Security Professional (CISSP) is the most globally recognized certification in the information security market. CISSP validates an information security professional's deep technical and managerial knowledge and experience to effectively design, engineer, and manage the overall security posture of an organization.

Prerequisites:

To obtain your CISSP certification, you must have a minimum of five years of full-time professional work experience in two or more of the 8 domains of the CISSP – (ISC)² CBK. A qualified individual with less than five years of experience will receive the (ISC)² associate title.

Course areas:

- Security and Risk Management:
- Asset Security:
- Security Architecture and Engineering:
- Communication and Network Security:
- Identity and Access Management (IAM):
- Security Assessment and Testing:
- Security Operations:
- Software Development Security

Who should attend:

The CISSP is ideal for experienced security practitioners, managers and executives interested in proving their knowledge across a wide array of security practices and principles.
